MTF (Margin Trading Facility) Risk Policy

Background:

MTF product offers features of buying securities with leverage against available margin (funds + collateral pledged) with PROSPERA FINSTOCKS PRIVATE LIMITED by the client.

Under this product, buy trades are allowed in product type 'MTF' with the leverage percent as defined on a daily basis as per internal risk approved list.

Leverage will not exceed (but can be more stringent) than SEBI defined criteria which is currently VAR + 3x ELM for stocks in derivatives and VAR + 5x ELM for non-derivatives stocks for Group I securities as per SEBI norms.

By nature, this is a leverage product and the client needs to maintain adequate margin at all point in time against his / her outstanding obligation.

MTF positions can be held indefinitely subject to margin norms. However, PROSPERA FINSTOCKS PRIVATE LIMITED. will have the right to change their policy of liquidating any positions after giving due notice.

Leverage and margins:

List of eligible stocks will be within the Group 1 securities as defined by Exchanges / regulators and minimum margin requirement would be at the same or higher threshold than the requirement as defined by regulators / exchanges.

Maximum leverage will be 4 times on base margin. E.g. If a client has 1,00,000 margin he / she can avail an exposure of 4,00,000.

Margin can be in the form of cash and / or non-cash collateral (stocks which can be considered as collateral will be as per internal risk policy) with applicable haircut.

Quantum of leverage may change on a daily basis and PROSPERA FINSTOCKS PRIVATE LIMITED will have the sole discretion to decide the same.

Maximum and Concentration Limits

Client Limit: 10% of member level limit

Stock Limit: Defined from time to time as per internal policy.

Client - Stock concentration: Defined from time to time as per internal policy.

Risk Liquidations

Mark to market (combined at client level across positions): In case 80% of available margin is eroded across products (including MTF) at a client level. This will result in instant square off of all open positions (including MTF but except normal delivery positions in the equity segment) without any further notice / margin call.

MTF shortfall: This is similar to Loan to Value (LTV) Or Collateral to Loan (CTL) monitoring for Lending products.

The MTF ledger balance of the client (negative amounts only) will be considered as the "Loan Amount" (A). Any balance in normal ledger (+ve or -ve will be ignored)

Available securities pledged for coverage will be valued at post haircut value where the haircut is the latest haircut as per the approved list for MTF. This can be termed as "Collateral Value for Coverage". At a stock level this value will be $\{(LTP \times Qty) \times (1 - HC\%)\}$. Value will be summed up across all pledged stocks under MTF (B)

$C = (B / A) \times 100$. If $C \leq 85$, then margin call will be triggered and the client needs to top up margin either by selling stocks or payment of funds within T+x days (by the EOD of T+x day where T is the date of margin call and days are calculated in form of trading days) (currently T + 1 day) from the date of margin call. In absence of the same, we will liquidate to the extent of making $C \geq 100\%$ on T+x +1 day (currently T+4 days) as per regulations in force.

Note that the criteria of approved stock for "B" above will be as per the date of margin call.

Ageing Liquidation: Not applicable currently.
